Module ICT3715

2022

INFORMATION AND COMMUNICATION TECHNOLOGY PROJECT ASSIGNMENT 4 | RUBRIC

Examination | November 2022

IDENTITY NUMBER (Student completes)												
9	6	0	3	3	0	5	0	2	8	0	8	8

Telephone number (only in exceptional instances where we need to contact you)

Instructions for the student:

Instruction(s)	Note(s)
Complete pages 3 - 6	
Save the completed document to PDF	Use Filename:
format.	StudentNumber_ICT3715_November_2022
	Example:
	12345678_ICT3715_November_2022

This Rubric will be used during the Examination by the Examiner to mark your Practical System.

Instructions for the student:

Instruction(s)

Insert on this page a copy (image) of your ID Document or Driver License or Passport or Student Card.

Instructions for the student:

Instruction(s) Student completes the following: 1. Programming Language(s) used 2. Database used 3. Describe your backup process that you have put in place for the database 4. Describe your recovery process that you have put in place to recover the database 1. Programming Language(s) used Php – for Backend Bootstrap and JQuery – For the user interface JavaScript 2. Database used MySQL Database 3. Describe your backup process that you have put in place for the database Store CSV to cloud / Store the SQL file to cloud: cloud storage platforms are much more of a safer place to store data as oppose to having the data saved in a memory stick or local pc HDD so I will use cloud storage platforms like google drive or dropbox to store the database records Hosting Provider backup: instead of just having the database on a local computer one may use hosting providers as they assist with backing up database for a certain amount and are very efficient. Exporting database: Saving Data from the database, the rows of data will be exported to a file known as the CSV file to have a copy of the future data that may be used on phpMyAdmin platform for MySQL database.

4. Describe your recovery process that you have put in place to recover the database
To recover the data, I will import the .sql or .csv file that was backedup /saved in my
local machine or cloud in order to get the data that was lost

PLAGIARISM PLEDGE BY THE STUDENT

Refer to:

https://www.unisa.ac.za/sites/myunisa/default/Assignments-&-Examination/Assignments/Plagiarism

https://www.unisa.ac.za/sites/myunisa/default/Study-@-Unisa/Student-policies-&-rules

	Tick the applicable box								
Yes	No								
٧		I have read Unisa's plagiarism policy.							
٧		2. I understand Unisa's plagiarism policy.							
٧		3. I agree to abide by Unisa's plagiarism policy.							
٧		4. I have read the direct copying, plagiarism, and "patch-writing"							
		document.							
٧		5. I understand what direct copying, plagiarism, and "patch-writing" is.							
٧		6. I undertake to avoid copying directly, plagiarism and patch writing.							
٧		7. All academic work, written or otherwise, that I submit is expected to be the							
		result of my own skill and labour.							
٧		8. I understand that, if I am guilty of the infringement of breach of							
		copyright/plagiarism or unethical practice, I will be subject to the							
		applicable disciplinary code as determined by Unisa.							
٧		9. The examiner has the right to refuse to assess the system if plagiarism is							
		detected.							

Student Names	Lehlohonolo
Student Surname	Macheru
Student number	60316950
Student Signature	Stale
Date	31/10/2022

The Examiner will not be able to mark your practical system without this signed plagiarism page!!

This Sections to follow will be marked (completed) by the Examiner

Practical System Component	Maximum	Mark	Mark I	ndication	Note(s)
	Mark	Awarded			
Documentation and Preparation	17		•		
Code	2		0	not available	
			1	does not meet minimum requirements	
			2	complete and meet minimum requirements	
User Manual	2		0	not available	
			1	does not meet minimum requirements	
			2	complete and meet minimum requirements	
Installation Manual	2		0	not available	
			1	does not meet minimum requirements	
			2	complete and meet minimum requirements	
Backup and Recovery of Database	3		0	not available	
[Refer to page 3 - 4]			1	does not meet minimum requirements	
			3	complete and meet minimum requirements	
Professional Impression	3		0	not on time	
			1-2	on time but not ready for examination	
			3	dressed according, on time and practical system	
				ready for examination	
Sufficient preparation done for the	5		0	not sufficient, unorganized	
evaluation			1	available, but unorganized	
(e.g., guiding document, steps to follow,			2	available, but did not cover all the	
data to use [student numbers –				requirements in this rubric	
passwords – Module Codes], etc.)			3 - 5	sufficient, organized	

Question 1	MIS Reports					
Login to the dashboard and display the MIS Reports to the Examiner						
Explain the MIS Reports to the Examiner						
Show the output of the MIS Reports to the Examiner						

Practical System Component	Maximum	Mark	Mark Inc	lication	Note(s)
	Mark	Awarded			
MIS Reports	20		•		
Daily MIS Report	5		0 - 2	0 - no report.	
				1 - report is created but does not reflect the data	
				correctly.	
				2 - only a long list of data is displayed.	
			3 - 4	3 - meets minimum requirements and student can	
				provide evidence on how the report was created	
				(SQL: tables, fields, etc.).	
				4 - meets requirements and student can provide	
				evidence on how the report was created (SQL:	
				tables, fields, etc.).	
			5	report exceed minimum requirements and can assist the	
				Exam Department in making predictions and use it for	
				future planning	

Weekly MIS Report	5	0 - 2	0 - no report.	
			1 - report is created but does not reflect the data	
			correctly.	
			2 – only a long list of data is displayed.	
		3 - 4	3 - meets minimum requirements and student can	
			provide evidence on how the report was created	
			(SQL: tables, fields, etc.).	
			4 - meets requirements and student can provide	
			evidence on how the report was created (SQL: tables,	
			fields, etc.).	
		5	report exceed minimum requirements and can assist the	
			Exam Department in making predictions and use it for	
			future planning.	
Another MIS Report	5	0 - 2	0 - no report.	
			1 - report is created but does not reflect the data	
			correctly.	
			2 – only a long list of data is displayed.	
		3 - 4	3 - meets minimum requirements and student can	
			provide evidence on how the report was created	
			(SQL: tables, fields, etc.).	
			4 - meets requirements and student can provide	
			evidence on how the report was created (SQL: tables,	
			fields, etc.).	
		5	report exceed minimum requirements and can assist the	
			Exam Department in making predictions and use it for	
			future planning.	

Another MIS Report	5	0 - 2	0 - no report.	
			1 - report is created but does not reflect the data	
			correctly.	
			2 – Only a long list of data is displayed.	
		3 - 4	3 - meets minimum requirements and student can	
			provide evidence on how the report was created	
			(SQL: tables, fields, etc.).	
			4 - meets requirements and student can provide	
			evidence on how the report was created (SQL: tables,	
			fields, etc.).	
		5	report exceed minimum requirements and can assist the	
			Exam Department in making predictions and use it for	
			future planning.	

Question 2	User Interfaces							
Login and create examination session for a Module for today [if not already existing]								
Time slot for the examination session for the Module must be between 9H00 – 14H00 for the day of the examination session								
Duration of the examination session must be 2 hours [thus from the student starts the examination session the student has 2 hours to complete the examination session] = Timer								
Login as the student and complete the examination session for the Module for today								

Practical System Component	Maximum	Mark	Mark Inc	dication	Note(s)
	Mark	Awarded			
Graphical User Interfaces (GUI)	18				
User (Student)	8		0 - 1	0 - no applicable front-end.	
Student taking the upload file				1 - GUI not correctly interacting with the	
examination!!				practical system and database.	
			2	GUI interacting correctly.	
				Dropdowns available.	
			3 - 4	3- 4 above and data validation fields, Student	
				number or myLife e-mail.	
			5	5 - above and data validation using REGEXP for	
				email.	
			6	complete the examination session.	
			8	e-mail confirmation send to the student.	
User (Lecturer)	5		0	no applicable front-end	
Set up examination session for the file			1 - 2	GUI not correctly interacting with the practical	
upload examination				system and database	
			3 – 5	GUI interacting correctly.	
				time slots and duration of the examination	
				sessions correct.	
				dropdowns available.	
				validation.	

User (Exam Department)	5	0	no applicable front-end	
Set up examination session for the file		1 - 2	GUI not correctly interacting with the practical	
upload examination			system and database	
		3 – 5	GUI interacting correctly.	
			time slots and duration of the examination	
			sessions correct.	
			dropdowns available.	
			Validation.	

Question 3	Database					
Explain the structure of the database [3NF]						
Show the information of the examination that was taken by the student for today (during your examination demonstration)						
Show where your files were uploaded on the system (your computer)						
Login to show your MIS Reports again						
Show the MIS Reports again to indicate that the MIS Reports have been updated with the new data in the database						

Practical System Component	Maximum	Mark	Mark Mark Indication		Note(s)
	Mark	Awarded			
Database	17				
Database correctly setup	5		0 - 1	0 - unable to provide access to the database.	
Data cleansed and imported from the				1 - database is not setup to reflect 3NF.	
Spreadsheets.			2	database is setup to reflect 3NF and	
All the tables included in the				referential integrity enforced (PKs and	
database				FKs)	
			5	database is correctly setup and data imported	
				from spreadsheet	

Update of Database	12	0	no updating of the database	
		1 -4	data updates but there are errors and	
			inconsistencies	
		5-8	student can show the uploaded files and the	
			data that is stored in the database	
		9 - 12	updates and inserts correctly reflecting in the	
			database and reports	

Question 4	Backup and Recovery of the Database			
Explain and show how your backup and recovery work for your database				

Practical System Component	Maximum	Mark	Mark In	dication	Note(s)
	Mark	Awarded			
Backup and Recovery	5				
Backup (for the client) correctly	3		0	no backup plan implemented	
implemented			1	backup must be done manually	
			2-3	backup automated (either from desktop or	
				within system)	
Recovery (for the client) correctly	2		0	no recovery plan implemented	
implemented			1	recovery must be done manually	
			2	recovery automated (either from desktop or	
				within the system)	

This Section will be marked by the Examiner when evaluating the documentation and your code received.

Practical System Component	Maximum	Mark Indication		lication	Note(s)
	Mark	Awarded			
Technical	23				
Level of programming	8		0 - 1	coding copied and pasted from other sources	
applied				without referencing or adapting for this project	
				and scope.	
				programming not on 3rd year level.	
			2 - 3	programming has lots of errors and system	
				crashes.	
				programming is sufficient.	
			4	OO programming implemented.	
			8	programming exceeds the requirements.	
Algorithms and functions used	5		0	no algorithms or advanced coding applied	
			5	examples of advanced algorithms and	
				functions included.	
				regular expressions used to validate data.	
				auto generated messages, warnings, etc	
General look and feel of the practical	10		1-5	the practical system meets the minimum	
system				requirements.	
			6 – 10	the practical system exceeds the minimum	
				requirements.
